PREVIEW THE METHOD, NOT JUST THE CHAPTER.

Selected lines from GradReady's linked Reasoning Textbook Volume I preview. Re-typeset excerpt; numbered annotations added.

SECTION 3 / BASIC SCIENCES – PRINTED PAGE 17

1 "However, you will need to understand the terminology, the basic concepts and theories within them, which may be difficult if you are from a non-science background."

2 "It is much more productive to do some background reading on a particular topic (i.e. cellular metabolism), and then apply this knowledge in practice questions, with the ultimate aim of developing your reasoning and critical thinking skills."

1 / Vocabulary unlocks the stem

Check whether the resource explains enough language and principles for you to start using questions.

2 / Reading leads to application

Look for an action after the explanation. The excerpt points from a topic to practice, rather than reading a whole textbook first.

Use the preview as a test

Read one explanation. Can you state the principle in your own words, then apply it to a real practice question and explain the reasoning?
