CHOOSE THE ROUTE THAT FITS YOUR STAGE.

Use the checklist to identify what to investigate next. Eligibility and selection rules are specific to each university.

- [ ] **School leaver? Investigate undergraduate entry**
  Check ATAR, required admissions test, interview and state TAC/direct application rules.

- [ ] **School leaver? Also investigate provisional entry**
  Check the conditional offer, specified bachelor, progression GPA and linked medicine program.

- [ ] **Completed or finishing a bachelor? Investigate graduate entry**
  Check degree recognition and age, prerequisites, GPA method, GAMSAT validity and interview rules.

- [ ] **Check application routes and place types**
  Record the correct portal and official deadlines. Consider living costs, rural-origin eligibility and bonded-place conditions separately.

- [ ] **Check what comes after medical school**
  An accredited medical degree leads into supervised internship and the registration pathway; graduating is not the end of training.

Official guide / outstanding eligibility questions

> Undergraduate medicine usually takes 5–6 years; most graduate MDs take 4. Provisional progression is conditional. Exceptions exist — do not choose a test or program on this overview alone.
