THREE STARTING ROUTES. ONE MEDICAL CAREER PATHWAY.

Start from your current study stage. These are broad routes, not an admissions guarantee.

Where are you now?

School leaver, or completed/completing a bachelor degree?

▼

UNDERGRADUATE

School-leaver route

Usually ATAR + UCAT ANZ + interview; check school-specific exceptions.

Medical degree usually 5–6 years.

GRADUATE

Bachelor to medicine

Bachelor degree first; GPA, GAMSAT and usually interview. Check exceptions and prerequisites.

Most MDs are 4 years; UTas uses a 5-year stream.

PROVISIONAL

Conditional school-leaver offer

Usually ATAR and UCAT-based selection. Complete the specified bachelor and meet GPA/progression conditions.

Progress to the linked medical program under the offer conditions.

▼

Complete an AMC-accredited medical degree

Then supervised internship (PGY1), the general-registration pathway, further prevocational and specialty training as applicable.

School-specific exceptions

Not every undergraduate program requires UCAT; Monash graduate entry has distinct rules. Verify the current university guide.

Provisional is conditional

An approved bachelor and progression requirements come before the linked medical program; it is not an unconditional place.

> The provisional lane is drawn from the same live page's "Provisional Entry & Combined Degree Programs" section. Current degree, test and progression rules must be checked for each program.
