

Venn Diagrams

● Answer: A

For the answer to this question, we are looking for a space that is within the “arm fracture” and “appendicitis” shapes, represented by the hexagon and the triangle, respectively. We are also looking for a space that is not within the “fainting” shape, represented by the oval.

As shown in the diagram below, we are looking for a space shaded BOTH green and blue, but NOT grey. The only correct answer is therefore option A (indicated in red).
